PROFESSIONAL EXPERIENCE

Customer Experience Partner | Jiffy.com
Mar 2026 – Present | Plano, TX (Hybrid)

- Investigate recurring customer-reported issues, identify patterns, and document findings to support product improvements and development review.
- Collaborate with developers, leadership, and production teams to troubleshoot technical issues, communicate customer feedback, and coordinate resolutions.
- Review AI-generated customer artwork and design edits for accuracy, identifying visual inconsistencies and potential quality issues.
- Resolve complex customer issues across digital design tools, file requirements, and ordering workflows, gaining firsthand insight into user behavior and common points of friction.
- Sustained CSAT scores as high as 95% across multiple months while resolving complex customer issues; recognized on the team's CSAT scoreboard for outstanding customer interactions.
